Better... because IT'S WELDED

● The modern truck tank is *better because it's welded!* Welding—the jointless construction—gives greater strength with less weight and bulk . . . makes possible bigger pay-loads. The welded tank is seamless, smooth—inside and out—no rough spots for corrosion—no place for germs to lodge.

Welding has made many good products better—truck tanks, refrigerators, radios, streamlined locomotives, metal furniture, and a thousand other things. You, too, may find it profitable to consider the advantages in both production and sales

which can be gained for your product by jointless design-for-welding.

Linde engineers will gladly cooperate with you in the design or redesign of your products for welding. The benefit of their broad experience is available from Linde Sales Offices located in thirty principal cities throughout the country and at 30 East 42nd Street, New York, N. Y.
